Chemical Reaction Engineering, Third Edition, helps students learn to answer reactor design questions in a reliable and effective way. To this end, the text emphasises qualitative topics, simple design methods, graphic procedures and frequent comparisons of the capacities of the main types of reactors. This approach helps students develop a strong intuitive sense for good design. Octave "Tavy a" Levenspiel, Professor Emeritus of Chemical Engineering at the State University of Oregon, died peacefully in the 90s on the 5th of March 2017, in the retirement community of Willamette View in Portland, Oregon, where he had lived for several years. A memorial service for his life will be held on Saturday 29th of April, from 13.00 to 17.00, in the Memorial Union Lounge. The service will start around 14:00. You are all welcome. Further details are available at: . The School of Chemical, Biological and Environmental Engineering has established the Octave Levenspiel Lectureship Fund, which will serve to support an annual seminar held by an illustrious lecturer of Chemical Engineering, and will also include a reflection on the classical seminars of Octavia. Donations to the Levenspiel Lectureship Fund may be made to the OSU Foundation, 850 SW 35th St., Corvallis, OR 97A 333. Levenspiel's career spanned more than forty years, producing hundreds of magazines and half a dozen authoritative textbooks. His novel Chemical Reaction Engineering, published for the first time in the 1961, has been cited more than 11.000 times and has been translated into more languages than any other volume of chemical engineering literature. An English primary and secondary school and a French university before sailing to the United States in the 1946 to complete his university studies. Graduated in chemistry from the University of California, Berkeley, in the 1947. He arrived at Oregon State University, where he graduated from 1949, and his doctorate in 1952, both in Chemical Engineering. After graduation, after marrying Mary Jo Smiley, she accepted her first teacher's appointment. His university education career eventually led him to Bucknell University in Lewisburg, Pennsylvania, then to the Illinois Institute of Technology in Chicago, and finally, he returned to Oregon State University, with two sabbatical degrees in Cambridge, England. He retired in 1991, but continued to write and edit his textbooks, including the third edition of reaction chemical engineering (1999), wandering through science and technology (2009) and Tracer Technology (2012). Lebenspiel survived by his 65-year-old wife, Mary Jo, two of his three sons, Morris and Bekki (husband, Keith Levien), and his three grandchildren, Kyle, Cody and Quincy Levien. He was preceded in death by his son Barney, who died in 2003. He was the main interest of him was the chemical reaction engineering, and was the author of an important chemical reaction technique of the text and numerous research publications [1]. Levenspiel's life was born in Shanghai, China, in 1926, son of Abe and Lily Levenspiel, who were Polish Jews who had gone to China to escape oppression in Europe. [2] At the age of 15, he was in the ship in the United States when the attack was verified at Pearl's port, then he was interned to Manila until the end of the war. [2] In the United States, he graduated from a degree from Berkeley in 1947. He received his doctorate from Osu in 1952, and after a period of teaching in other schools he returned to Osu where he spent the rest of the His career, withdrawing in 1991 but continues professor emeritus. [2] In 1952 he married Mary Jo Smiley and had three children. He died on March 5, 2017. [2] Working the Levenspiel plot takes its name from him. Levenspiel was well known among his students for his ability to make rapid back-of-the-buse calculations. GNU Octave, a high-level language intended primarily at numerical calculations and developed by John W. Eaton, a former Octave Levenspiel student, takes its name from him.
