# Computer questions answers

General knowledge has been defined in differential psychology as "culturally valued knowledge communicated by a range of non-specialist media" and encompassing a wide subject range. Studies have found that people who are highly knowledgeable in a particular domain tend to be knowledgeable in many. General knowledge is thought to be supported by long-term semantic memory ability. Why General Knowledge Basic Computer Quiz is Required? In this General Knowledge section you can learn and practice GK Questions with Answers based on "Basic Computer Quiz" to improve your skills in order to face written test by IT companies, interview and various entrance tests like Bank Exams, Railway Exams, ICET, GATE, CAT, GRE, MAT, etc. Where can I get Basic GK questions and answers? All India Exams provides wide variety of topics on Basic Computer Quiz General Knowledge Questions and Answers. These topics are very useful for quiz competitions, entrance tests and many competitive exams. What Topics Covered in Basic Computer Quiz General Knowledge Questions and Answers The following topics are widely covered in All India Exams - Basic Computer Quiz GK Questions and Answers. Apart from these below topics we will be adding more and more topics in regular intervals. So Keep visiting this space. Basic General Knowledge Questions and Answers Inventions Books and Authors Inventions in the World Indian Politics Indian Parliament Indian Economy Sports Indian Geography World Geography Famous Days and Years Sports Physics Chemistry Zoology Biology Famous Places Awards Technology Botany Many More GK Questions and Answers Computers are in a true sense a super-genius invention!Are you genius enough to try out these computer trivia questions and answers? Computers have since long been an excellent asset for the digital world we all are a part of today. Information technology has been reaching many milestones since the discovery of the first computer. Are you someone who loves multitasking, who likes the fast speed of work, 100% accuracy, and reliable security, then you must surely be a computer enthusiast? Computers have been making our lives and work simpler for decades. The brilliant inventors of the computer and its parts had a vision of creating an unforgettable device to inspire today's youth. Not only do computers improve easy connectivity, but they also aid in serving with an ample amount of new information at just a click. We have all witnessed the evolution of computers from desktop to laptops to palmtops and tablet PC. With new programs and technologies being introduced consistently, one day, computers would eventually rule the world! For such an intelligent addition to our lives, we have curated a super interesting computer trivia game for you and your friends. Answer these computer trivia questions to test your skills and knowledge about the world of computers. If you liked our 80's trivia and video game trivia these computer science trivia questions are perfect for your geeky mind!Did you know that the first computer in the world weighed more than 27 tonnes and covered an area of about 1800 square feet? It used mechanical relays and vacuum tubes which were later replaced by transistors, integrated circuits, and silicon chips in modern computers. As the world progressed, information technology witnessed the evolution of the computer. Check out this trivia about computer history to learn some more facts about computers. Answer these computer history questions to check if you are the ultimate IT geek!1. Question: When was the first computer invented?Answer: 1943.2. Question: What was the name of the first computer invented?Answer: Electronic Numerical Integrator and Computer (ENIAC).3. Question: Who is known as the father of computers?Answer: Charles Babbage.4. Question: What was the first computer system that used color display?Answer: Apple 1.5. Question: What was the first mass-produced computer?Answer: IBM 650.6. Question: When was the first 1 GB disk drive released in the world?Answer: 1980.7. Question: What was the name of the first computer programmer?Answer: Ada Lovelace.8. Question: Who is called the inventor of the first modern electronic computer?Answer: Konrad Zuse.9. Question: How many generations of computers have been invented?Answer: Five generations.10. Question: Which popular company designed the first CPU?Answer: Intel Corporations.11. Question: What is the name of the first automatic electronic digital computer?Answer: Atanasoff-Berry Computer (ABC).Computer Parts Trivia!It is interesting to know that the parts that are now used in the new modern computer were invented in the year 1833. One basic function of a computer system is to receive commands and provide the respective output in return. It calculates, stores, and protects our data. To perform such expert functions, a computer has many different parts. Various system applications and programs aid to manage the information in a computer. Check out these questions about computers to test if you know all trivia about computer parts.12. Question: What does 'CD-ROM' stands for?Answer: Compact Disc Read-Only Memory.13. Question: Which computer hardware device performs the functions like click, point, drag, or select?Answer: Mouse.14. Question: What is the computer's main circuit board called?Answer: Motherboard.15. Question: What is the name of the system that manages and programs hardware resources for a computer?Answer: Operating System.16. Question: Which information storage is used to store short-term running programs and data in a computer?Answer: RAM (Random Access Memory).17. Question: Which input device is used to enter letters, numbers, and other characters into a computer?Answer: Keyboard.18. Question: Which output device is used to display information in visual pictorial form?Answer: Monitor.19. Question: Which part of the computer fetches, decodes, and executes the programming instructions?Answer: CPU (Central Processing Unit).20. Question: What is the name of the device that performs both input and output functions in a computer?Answer: Modem.21. Question: 'Laser', 'Dot Matrix' and 'Inkjet' are types of which output computer device?Answer: Printer.22. Question: What is the full form of UPS?Answer: Uninterruptible Power Supply.Computer Companies Trivia!There have been many computer system manufacturing companies. IBM, Dell, Apple, HP, Lenovo, Acer, etc. are some of the notable manufacturers of computer devices. Answer these computer-related quiz questions to know more about the contributions of big organizations in adding a touch of innovation to our digital world. These companies have also designed new programs with an incredible user interface. It's time to check out these information technology trivia questions to test your knowledge about these popular computer companies. 23. Question: Popular computer brands like Apple, Dell and Microsoft started their offices from which place?Answer: A garage.24. Question: Which two people co-founded Apple Inc. in 1977?Answer: Steve Jobs and Steve Wozniak.25. Who is Netizen ?Ans : Net Citizen (Citizen who uses internet)29. What is Scareware?Ans : Fake antivirus softwares30. When was the first smart phone launched?Ans : 1992 (IBM Simon) Answer & Solution Answer: Option B Solution: SMTP (Simple Mail Transfer Protocol) is a TCP/IP protocol used in sending and receiving e-mail. However, since it is limited in its ability to queue messages at the receiving end, it is usually used with one of two other protocols, POP3 or IMAP that let the user save messages in a server mailbox and download them periodically from the server. SMTP usually is implemented to operate over Internet port 25. Many mail servers now support Extended Simple Mail Transfer Protocol (ESMTP), which allows multimedia files to be delivered as e-mail. Answer & Solution Answer: Option A Solution: In 1945, Professor J. von Neumann, who was then working at the Moore School of Engineering in Philadelphia, where the E.N.I.A.C. had been built, issued on behalf of a group of his co-workers, a report on the logical design of digital computers. Answer & Solution Answer: Option D Solution: In MS Excel, formulas are equations that perform various calculations in your worksheets. Though Microsoft has introduced a handful of new functions over the years, the concept of Excel spreadsheet formulas is the same in all versions of Excel 2016, Excel 2013, Excel 2010, Excel 2007 and lower. All Excel formulas begin with an equal sign (=). Answer & Solution Answer: Option C Solution: There is 5 generation of computer available till now. 1st Generation of Computer = The period of first generation: 1946-1959. Vacuum tube based, 2nd Generation of Computer = The period of second generation: 1959-1965. Transistor based, 3rd Generation of Computer = The period of third generation: 1965-1971. Integrated Circuit based, 4th Generation of Computer = The period of fourth generation: 1971-1980. VLSI microprocessor based, 5th Generation of Computer = The period of fifth generation: 1980-onwards. ULSI microprocessor based. Computer Fundamentals Practice Mcq Question and Answer GK Computer Edit Computer Hardware And Software Short Quiz Computer Hardware and Software Short Quiz A computer needs two things to be considered as one, and these two are the hardware and software.
