Deaconess chancellor center for oncology

According to the American Cancer Society, lung cancer is the leading cause of cancer death among both men and women. Each year, more people die of lung cancer than of colon, breast, and prostate cancers combined. An annual test for lung cancer intended for long-term smokers is now being recommended by major medical organizations, including the U.S. Preventive Services Task Force. Low-dose CT, offered by Deaconess Hospital, can help detect lung cancer at its earliest, most-treatable stages. Low-dose CT is a lung cancer screening option available to higher-risk patients that utilizes much lower radiation than a typical CT scan—up to 70-90% less—and can find lung cancer in early, more-treatable stages. To be eligible for the screening, you must have the following risk factors:

- Be between the ages of 55-74
- Have a 30 pack-year history or more (details below)
- Be currently smoking or have smoked within the last 15 years

All three criteria must be met for this testing. Because the test does involve some radiation, the risk for lung cancer must be higher than the overall lifetime radiation risk. The “pack-year history” is determined by calculating how many packs of cigarettes per day have been smoked for what number of years. For example, if an individual started smoking at age 20, and smoked a pack a day until age 50, that would be 30 pack years. If that same person smoked 2 packs per day, 30 pack years would be reached by age 35. If someone thinks they may be a good candidate for the test, getting started with the process is easy. The first step is to call the Nurse Navigator at Chancellor Center for Oncology at 812-858-2268. The test takes place at the Deaconess Hospital main campus at 600 May Street in Evansville, Indiana. The testing appointment will last less than 30 minutes. The results are interpreted by a board certified radiologist, and are also presented to the Deaconess Multidisciplinary Lung Nodule Review Board where each patient’s scan and history is individually reviewed. The patient is then called with results and recommendations, and both the patient and their primary care physician will receive copies of the results. Many insurance companies currently pay for the screenings, and more are expected to do so soon. Staff at the Chancellor Center will work with individuals’ insurance companies to determine coverage, and handle billing. If someone wants this test and is a good candidate, and their insurance doesn’t cover the test, we will work with patients on affordable payment options. We want this life-saving service to be available to as many people as possible.

- Henderson, KY, United States DHS DC Henderson FM Full Time - 80 - Day Deaconess Clinic Deaconess Health System on Monday announced that it has joined the MD Anderson Cancer Network, giving local patients and doctors access to a nationally recognized provider of treatment and research. Based in Houston, the University of Texas MD Anderson Cancer Center is No. 1 in the 2016 U.S. News & World Report list of best hospitals for cancer care, and it is routinely first or second on that list. Deaconess will be the 16th local health care provider to join MD Anderson’s chain of local providers. The affiliation will mean doctors will have access to the most current research and treatment information, and second opinions about tough cases, according to Deaconess officials. “This is all about better patient care to be delivered in our community,” Deaconess CEO Linda White said. Deaconess began pursuing the MD Anderson affiliation about three years ago. Officials likened the process to being audited. The process included MD Anderson site visits to Deaconess facilities. “There was a philosophy and mission of patient care with MD Anderson that was very similar to our philosophy and mission,” White said. “So we continued to explore, and it was an extensive review of a lot of things. It’s a major investment of time and resources.” It is a very in-depth review of the medical care a patient receives, from all disciplines. It really is the total patient care experience. They would look at a medical record, and aspects of that medical record to see if it meets the protocol, the standards established by national researchers practicing at MD Anderson. “The MD Anderson affiliation will give Deaconess oncology doctors and staff regular, easy access to experts in breast cancer, leukemia and other forms of cancer.” There’s not a better institution continuing education for physicians and access for opinions,” said Dr. Chris Braden, chairman of the Deaconess Oncology Committee. “We can keep up to date on the most cutting edge research, and if you have a challenging case -- the patient comes in and there’s some question about how you would handle that case -- we can summarize the information, send it to them and they will expedite a second opinion.” It’s good for the physician but it’s better for the patient,” Braden said. MD Anderson spent about \$780 million on cancer research in 2015. Because of its national reputation, MD Anderson’s services are in demand -- the provider deals with 130,000 cases a year -- and the affiliate network enables MD Anderson to touch more patients, according to officials. MD Anderson’s goal is to grow the network to about 30 providers. Before Deaconess joined, the nearest MD Anderson Cancer Network provider was Community Health Network in Indianapolis. As a network member, Deaconess services will be continuously evaluated, and the health system will spend to remain a part of the chain. “We look at that as the right thing to do for this community,” White said. Doctors with Deaconess were presented MD Anderson pins during a ceremony Monday announcing the affiliation. Evansville Mayor Lloyd Winnecke and Rep. Larry Bucshon, R-8th District, attended. Also present was Evansville businessman Steve Chancellor, whose family name is on the Chancellor Center for Oncology, which opened in 1993 at the Deaconess Gateway campus in Warrick County near Interstate 69 and Lloyd Expressway. The family raised more than \$3 million toward the building’s construction. Chancellor’s wife, Terri, lost her brother to cancer, and Chancellor lost his father to cancer. Both died when the Chancellors were young children. “We’re thrilled (about the MD Anderson affiliation),” Chancellor said. “It’s testament to the great work Linda and her staff does.” Join an oncology team that’s a regional leader in cancer diagnosis and treatment. Therapy Associates are seeking an energetic BC/BE radiation oncologist to join two experienced radiation oncologists who practice at the Deaconess Chancellor Center for Oncology. Five days per week seeing outpatients at this facility; rotation at Evansville Cancer Center on an as-needed basis. Rotate weekend call. Candidates with SRS training and HDR brachytherapy are preferred. This opportunity offers: Excellent compensation package; two-year salaried position followed by parity with the other physicians. Full health, dental, disability and malpractice benefits; 401k investment package; CME allowance; Six weeks vacation/CME for the first year; seven weeks the second year. After that, negotiable. 2022 new graduates welcome. MD Anderson Cancer Network Certified Deaconess is a certified member of MD Anderson Cancer Network, a program of MD Anderson Cancer Center. Our oncologists are certified physicians of the MD Anderson Cancer Network, and the candidate will have the opportunity to be as well. As a certified member of the network, our certified physicians have access to best practices, evidence-based guidelines and treatment plans developed by MD Anderson experts. Our certified cancer specialists can also consult directly with their counterparts at MD Anderson in Houston, Texas. Our affiliation combines the best of what we provide locally with the world-renowned expertise of MD Anderson. Tri-State Radiation Oncology Deaconess and US Oncology operate as Tri-State Radiation Oncology, a joint venture that operates two cancer centers in Evansville, Indiana. The Chancellor Center for Oncology is a hospital-based facility associated with Deaconess Health System. Evansville Cancer Center is a free-standing facility. Tri-State Radiation Oncology Deaconess and US Oncology operate as Tri-State Radiation Oncology, a joint venture that operates two cancer centers in Evansville, Indiana. The Chancellor Center for Oncology is a hospital-based facility associated with Deaconess Health System. Evansville Cancer Center is a free-standing facility. Deaconess Health System is a leader in health care services in the Tri-State. The system includes 14 hospitals throughout southern Indiana, Kentucky and Illinois, more than 50+ ambulatory clinic locations throughout the region, and several ancillary facilities. We have received multiple HealthGrades awards and were named by US News and World Report in 2019 as Best Regional Hospital in six types of care. JONDR GROWING HEALTH SYSTEM Deaconess Midtown Hospital offers a broad range of high-quality, compassionate inpatient and outpatient medical, surgical and diagnostic services, including a Level II Trauma Center. Deaconess Gateway Hospital provides a full range of acute-care services, including emergency medicine, surgical services, heart care and more. Comprehensive pediatric care is provided through a partnership with Riley Hospital for Children. The Heart Hospital at Deaconess Gateway is the only acute-care hospital in the region dedicated to heart and vascular care, and it’s unique in its use of a “universal bed” model, in which patients receive all levels of care in one room. The Women’s Hospital provides a complete range of health care services to women and infants. Deaconess Orthopedic Neuroscience Hospital opened in 2018. This specialized hospital offers expanded surgical services for orthopedic or neuro surgeries, designated neuro post-surgical care units for spine surgeries, minimally-invasive neuro procedures, biopsies and brain surgeries. Other Hospitals and Affiliates Include: Deaconess Henderson Hospital (Henderson, KY), Deaconess Gibson Hospital (Princeton, IN), Lawrence County Memorial Hospital (Lawrenceville, IL), Ferrell Hospital (Eldorado, IL), Deaconess Cross Pointe, Etcopass Health Deaconess Rehabilitation Hospital (2 locations), and Linda E. White Hospice House. THERE’S A LOT TO LIKE ABOUT EVANSVILLE Located in southwestern Indiana, Evansville is Indiana’s third largest city. We offer big-city amenities with small-town Hoosier hospitality. This dynamic, progressive city offers: Cultural opportunities, low cost of living, Good schools, Thriving economy, Historic and scenic riverfront.
