There are dozens "Probably hundreds - of Android phones on the market today. Some of them are exclusive for specific vectors, some of them are available throughout the world, but only some of them are at the top of their class. This week we wanted to know What Android phones thought were the best available, not just because a high-end functional or high-end hardware lists complete, but why do you think you offer a great overall experience. Here is a look at the top five Android phones, based on yours Nomination. At the beginning of the week, we asked you what Android phones that you think was the best. There are many sites willing to tell you what the phones are the best based on the chips inside, the camera, storage or version of Android pre-installed, but those things are not always added to an excellent user experience. We asked you what "past or present - thought phones were the best, and OL Three 300 nominations later, we returned to highlight the first five. The survey is closed and the votes are counted! To find out which of the five contenders below followed the first prize based on your votes, go to our Alveario Five Follow-Up Post to find out and discuss the winner! Looking for a decent Android phone? Of course, we know that the market will be completely different within a reading of Moresamusung Galaxy Note often indicated as "Phoneble" because of its inclusive and massive stylus super amoled display 5.3 ", the Samsung Galaxy note (AT & T, \$ 299 W / contract) is enormous, but many of you praised to mix the portability of a phone with some real estate goods from desperately necessary tablets. The 8MP and 2MP rear and front cameras and the 1.4 GHz double-core processor do not damage the issues, and while it is certainly not the right size for everyone, those of you who have a love, and others do not see the time that comes its release on other couriers. Furthermore, even if the note galaxy ships with Android 2.3 Gingerbread pre-installed, there are many ROMs available to take it to the Sandwich Ice Cream Android 4.0 or simply replace the touchwiz interface of Samsung entirely. HTC One X / S HTC One Series is the most recent active Or HTC to recreate himself, not the company really needs "most people who have used HTC devices love them and the HTC One X and ones are not exceptions to the rule. The only X (AT & T, \$ 199 W / Contract) is the new HTC tip phone, the 4.7 "sports screen, a quad-core NVIDIA Tegra 3 (internationally) or a dual processor -Core Qualcomm Snapdragon (US / Canada), Android 4.0 ICE Cream sandwich (with UI Sense HTC on top), built-in audio beats and a 8 MP rear camera with a 1.3pp front camera. HTC One S (T-Mobile, \$ 189 W / Contract) On the other hand, it is a 4.3 "slightly smaller screen, a 1.5 GHz double-core processor, 8MP rear and VGA front cameras, audio beats and ice cream sandwich. Both devices are thin, the Powerhouse devices designed to report the Focus Android Lovers back to a group Select high-end HTC devices, instead of dozen-plus HTC released in the past. So far, it works. SAMSUNG GALAXY S / S The Samsung Galaxy S series of devices are some of the world's most popular smartphones, and even if Samsung and Apple are involved in a patented cause exactly as it is similar to the galaxy the iPhone ( And vice versa), which has not stopped the galaxy S and the Galaxy S II to sell millions of units around the world. The Galaxy S was one of the first Android dual-core smartphones, and certainly one of the first to present the new (at the time) Samsung's super love display, offering bright and crispy colors even in intense light. It is still available for a song a Of the courier you take it from (to the United States, it was sold under the vibrating name (T-Mobile), Captivate (AT&T), fascinate (verizon wireless) and Epic (sprint) in both 3G and 4G variants. ) Party history, the Samsung Galaxy S II is the current model of the company and has a 4.3 "super amoled display, a 1.2 GHz double-core processor and while while While Android 2.3, most carriers have slowly rolling upgrades to bring the device to Android 4.0. Prices vary depending on the courier and of the variant that you collect, but one thing is certain: when it was launched, most people considered the Galaxy S II the best Android smartphone & #39; if it is not The best smartphone ... available on the market, which makes the fury available on the market on the next Samsung Galaxy S II that Motorola's Droid series (Motorola Milestone, internationally) was one of the first phones Android on the market to take really Android to the masses - and surely the first Android phone available on Verizon Wireless at the moment. It was a hard call to group the Droid series together, but it is worth noting that those of you who named the Droid line in large numbers specifically mentioned the cursor models, not the Candybar models such as the Droid RAZR, Razr Maxx, or bionic (although all have all strong nominations), all available on Verizon Wireless in the United States. Motorola Droid 4 (VZW, \$ 199 W / Contract) is the current phone iteration, with a 4 "QHD display, a 1.2 GHz double-core processor, a 8 MP rear back and front cameras from 1 , 3 MP and in particular, a slide -out backlit keyboard that allows the phone to be used in both portrait and landscaping modes without sacrificing the real estate screen. The Droid line is still one of the few high-end Android devices to present one Physical keyboard, making it popular both for portability and with people who prefer physical keyboards to those on the screen. Android Gingerbread Sport Droid 4 and Rides Verizon Wireless' 4G Network. Samsung Galaxy Nexus (VZW, Sprint, \$ 199 / W Contract, \$ 399 unlocked) is the official current "Google Phone", having launched with Android 4.0 Ice Cream Sandwich and currently acts as a peak Android device. Sport has a Super AMOLED 4.6 "screen, a o Curved outline screen, a 1.2 GHz double-core processor and a 5 MP and 1.3 MP back back and front cameras. It is a pure google experience, which means that the phone is (largely) free of bloated software and other apps pre-installed by vendors and producers, and lacks Samsung's ui ui level in favor of a clean version Sandwich ice cream. The phone also sports the Google NFC payment system, Google Wallet. The camera boasts a zero shutter LAG, and it was the first phone to launch with the pre-installed ice cream sandwich, and it's still one of the few devices you can get this. If you want the true and more pure Android experience, or you want an Android phone that is officially supported by Google, this is. This to. There is true, the first five Android phones, based on your nominations. Now it's time to vote for all out of champ.it it was difficult this week to run the first five considering that there are three Samsung devices in the race, but some of them have obtained more nominations than some other combined contenders. So we can combine ignore the fact that many of you have a strong opinion on these specific models. Do you have the thing to say about the candidates we've lost? Does your favorite phone does not have enough nominations to include? Remember, the first five are based on your most popular nominations from the call for the contenders thread from previous week. Share your thoughts in the comments below. The five hive is based on the reader's nominations. As with most of Hive Five's posts, if your favorite was left out, it's not because we hate him "it's because he has not received the requested nominations in the call The post of the contenders to make the first five. We understand that it is a bit of popularity competition, but if you have a favorite, we want to hear it. Have a suggestion for hive five? Send us an email to tips+hivefive@lifehacker.com! Pittaya Sroilong ofoto. The easiest way to get the Android TV practically on any device is with a set box. However, there is a small selection of TV with built-in Android TV. There are Benefits to get a TV with Android TV. For appetizers, they are all with Chromecasts. Also, you just need a remote control rather than two. There are some wonderful selections here, even if not all are available anywhere. Here are the best Android TVs! The best Android TV to buy: Note of the editor: We will update this list of the best Android televisions regularly as new the launch again. What are my options? Unfortunately, the list of television producers selling Android televisions is quite thin. Includes Hisense, Philips, Sharp and Sony with some smaller players here and there. Most televisions prefer their own operating system of a company, like Samsung with its Tizen platform while others collaborate with third-party sellers, such as TCL and its partnership with Roku. thus, the list of televisions with Android is Rather short and ... I am dominated by Hisense and Sony in most parts of the world. However, if you don't find something you like on this list, you can hit the official website to see all the global partners. This should give you some additional options we could have lost. 1. Best TV Overall Android: Sony A9GLA Sony A9G is the best choice for Android televisions. The last OLED offer of Sony is equipped with a metric ton of functionality. The image is exceptional and the OLED screen offers perfect blacks and the highest possible contrast ratio for a television. Comes with a subtle design, decent TV speakers and enough HDMI ports for whatever you need. The auditors complained about the color calibration out of the box. However, this is quite easy to fix with a small patience. The Android TV experience is also positive. You can use Google Assistant on any HDMI input to ask what you need anything. Of course, like most Android televisions, there is an integrated chromecast and the upscales TV content better than most. The A9G represents not only the best option in this space, but also the most expensive at the time of writing. By the Sony A9G Amazon 2. Midrange TV Android: Sony X950HWE & #39; # Return again with Sony for our Midrange option. It is a LED TV with a local variable of complete matrix. This means that it has no border lights like most LED televisions, has a group of lights throughout the TV that lights independently. The complete lighting of the array gives more deep black LED TV compared to most live TVs and can make other ordered tricks. This TV is still quite expensive, but it is supplied with the goods. Opens the old content very well, it has an exceptional brightness for the HDR content, a wide range of colors and a contrast ratio higher than the average. Of course, Android TV touches an excellent selection of functionality. Also, this TV for its younger symbols. The back of the TV legs is empty so you can hide the cables. Also, all four HDMI ports support HDMI 2.0, a feature that becomes more common but is still a bit difficult to find consistently. It does not support 120Hz update rates and observation angles are predictably bad, but otherwise, this is a rock-solid TV. Buy the Sony X950H on Amazon 3. The best Low End TV Android: Hisense H8GT The Hisense H8G is a surprisingly decent TV for your price tag. Comes with a full local maturation matrix such as the Sony X950H much more expensive and can produce comparable contrasts and black levels. The quality of the image, the brightness of the peak, the upscaling of the lower resolution and the colors are all surprisingly good for a TV in this price range. Some auditors yes Of uniformity but you shouldn't see problems unless you really look for it. The peripherals are also good. All four HDMI ports support HDMI 2.0. Unfortunately, there is no HDMI 2.1 support or support for Dolby, but not many televisions have those at no price range. Supports HDR10 and Dolby Vision and which puts it just on par with most other televisions on this list. In short, it's good. The biggest problems we could find include a gray and black uniform in some scenarios, sound, out of the color calibration of the box, and works a little warmer than most of the televisions. Course, there are little little Here and there is more expensive TVs better. You also paid more than double for those little things. This makes Hisense one of the smartest options for those who buy a limited budget, especially when you consider that you don't have to buy an additional set or a chromecast. Buy Hisense H8G Amazon 4. Best Android TV Budget: Skyworth Q20300Lo Skyworth Q20300 is among the most economical Android TVs on the market. 55-inch rides for \$ 450 at the time of writing while the 32-inch size (perfect for bedrooms) are performed for just one \$ 150. Considering that most people don't know Skyworth, we understand if this is not "Your first option. The TV has its right part of defects. However, for \$ 150, you shouldn't expect the moon here. The television has colors, sound, brightness and contrast useful, but has absolutely not won the mind. Keep in mind, let's talk about the SUB \$ 200 category here. Obviously they obviously make some sacrifices that descend this bass. This said, the Android TV option works quite well but late from time to time. Some people reported WiFi drops and we also had those, even if rarely. If you really want a smaller, cheapest TV, we advise you to find something else and go for a Chromecast or, if you want something in the 55-inch interval, then to unleash the \$ 150 extra and going for the much better H8G H8G. We have included this TV for completeness, but here is only here because it has no competition. It is the most economical Android TV. Buy Skyworth Q20300 here! 5. BEST FOR INTERNATIONAL FOLKS: Philips 804 Oledit is extremely disappointing that Philips does not sell its 804 OLED TV in the United States. & #39; #14.000 OLED TV with excellent image quality, decent upscaling, and, as with all OLEDs, a perfectly perfect contrast relationship. Unfortunately, due to availability, I was not able to control it personally. So, I put myself on the reviews for my information here. The specifications are as you would expect. It includes four HDMI-out ports, integrated chromecast and a remote control with activated controls & #39;
