

I'm not a bot

Hello,I am currently working on a game and am looking for a reliable admin panel to handle basic moderation tasks, such as kicking, banning, and running commands.I have seen HD Admin and Adonis mentioned in many games, but I am looking for some recommendations that offer the best combination of the following:Ease of setup: A panel thats quick and straightforward to implement would be ideal.Customization: I would like the ability to easily customize commands, permissions, and possibly the UI.Stability: Since my game may not have a large number of players, Im looking for something that works smoothly without heavy server demands.Up-to-date: I need an admin panel that is actively maintained and suitable for 2025.If you have experience using these or other admin panels and could share your thoughts on their reliability, features, and any potential limitations, Id greatly appreciate it.Thanks in advance! : 57151[: 492[[]zzmaster 2022-8-12 15:01 zmaster 2022-9-15 17:13 VNCradmin,WindowsLinux,VNC VNCRealVNC, TightVNC, UltraVNC,UltraVNC 1.UltraVNC 2.TightVNCUltraVNCUltraVNCIP 1. 2. 3. 4. 5. 6.
