Mini Stagebox 32R/16R Mini Stagebox 32i/16i Si Option Cards Notepad Series Si Series Signature Series Signature MTK Series Ui Series ViSi Remote ViSi Listen Audio Calc Toolkit legacy products The Ui Series mixers feature cross-platform compatibility with iOS, Android, Windows, Mac OS, and Linux devices, and can be used to control devices simultaneously. In addition, the Ui12 and Ui16 each feature built-in HARMAN signal processing from dbx, DigiTech and Lexicon, including dbx AFS2, DigiTech Amp Modeling, and more. Both models feature fully recallable and remote-controlled mic gain and phantom power, along with 4-band parametric EQ, high-pass filter, compressor, de-esser and noise gate on input channels. Both mixers offer 31-band graphic EQ, noise gate and compressor on all outputs, plus real-time frequency analyser (RTA) on inputs and outputs. Built in are three dedicated Lexicon FX busses: Reverb, Delay and Chorus. In addition, mixer controls include Subgroups, Mute groups and View groups, among others. The Ui Series mixers feature full Show/Snapshot recallability with channel recall safes, while security lockout features allow customization of device access to only specific functions and mixes if needed. Both mixers also offer independent network interfaces on board for simultaneous control by Wi-Fi and Ethernet, plus a floor-ready rugged chassis for live applications. The Ui16 boasts eight XLR combo mic/line inputs, four XLR mic inputs, two channels of Hi-Z/instrument inputs, as well as a stereo RCA line input. A 2-channel USB media player is included, along with four balanced XLR Aux outputs, two quarter-inch headphone outputs with level control, plus balanced stereo XLR and quarter-inch main outputs. Two-channel USB audio playback is compatible with MP3, WAV and AIFF formats, and 2-channel USB Record direct-to-memory devices functionality is possible as well. The Soundcraft Ui24R is a complete, rack-mountable, digital mixing and multi-track recording system that delivers flexible I/O pristine sound quality, intuitive wireless control, and roadworthy reliability all in a streamlined design. The system can double as a stagebox and can be controlled by up to 10 devices via Ethernet or built-in dual-band Wi-Fi, making it possible to control mixing and multi-track recording wirelessly from anywhere in the venue. With renowned HARMAN signal processing, Studer-designed preamps and much more from the studio to the stage, Soundcraft Ui24R is the ultimate system for artists, venues and engineers who need to save space and deliver superior sound. HARMAN Sound Quality and Reliability Ui24R brings together industry-leading HARMAN technologies to deliver uncompromised power and mission-critical stability. Renowned Studer preamps deliver rich sound for live performance and multi-track recording, while iconic Lexicon reverbs, choruses, delays, and dbx compression offer polished results for vocals, acoustic guitar and more. dbx AFS2 automatic feedback suppression is available on all monitor outputs, providing an excellent live experience. Plus, DigiTech guitar amp modeling brings a host of effects to any performance, particularly when low stage volume is desired. More Ways to Connect When you need a mixer with comprehensive connections and a compact footprint, Ui24R provides the perfect, streamlined solution. The Ui24R allows you to mix from multiple sources including 10 combo 1/4"-TRS/XLR, 10 XLR, 2 line level inputs, and 2 channels of digital USB playback for a total of 24 channels. With its flexible and high-quality I/O, Ui24R gives venues, bands and engineers room to grow, with expanded creative options. More Ways to Control Control Ui24R from the device of your choice (tablet, phone, PC, Mac) via iOS, Android, Windows, Mac OS and Linux browsers, without installing apps. Onboard dual-band WiFi ensures you (and up to 9 members of the band) can always stay in control without relying on an independent router or the venue's WiFi. Musicians can adjust their individual mix on stage while the FOH engineer optimizes the audience experience. Multi-track Recording and Playback Ui24R is more than just a complete mixing system; it's also a top-notch recording tool. Enjoy peace of mind with dual-path, multi-track recording of all 22 inputs and your stereo mix, directly to a USB storage drive AND a connected computer. The multi-channel USB audio interface also makes it easy to integrate the Ui24R into your recording studio for production work with your favorite DAW. The Ableton Live 10 Lite software is an included download with all Ui Series mixers. Feed your creativity with this fast, flexible and sequencing workstation. From built-in instruments, sounds and effects to recording and mixing features, Live 10 Lite gives you everything you need to create, produce and perform. More Freedom Traditional mixers offer lots of functionality, but can only be controlled from the mix console position. The Ui24R surfaceless mixer combines the power and versatility of a large-format console with a compact design and complete Wi-Fi control. With Ui24R, you can finally have the features you need, plus the freedom to control your mixer from anywhere in the venue. New Ui24R v3.0 Firmware Available Now With the free v3.0 firmware update, the Soundcraft Ui24R has been enhanced with Cascading and a number of other significant new features. Cascading enables you to connect two Ui24R systems via Ethernet to expand your mixing capability with a new 32x32 bi-directional audio bus. Add a second Ui24R to double your mic inputs or connect two Ui24R mixers and control two fully independent mixes, such as FOH and monitors, or FOH and streaming mixes. Features in the free 3.0 firmware update: Cascading: Double your inputs or double your mixes. Cue Recall: save mix settings as Cues and then quickly and seamlessly recall them. UDP Control Recall: for triggering lighting control snapshots. Lexicon Reverb PreDelay: easily set the time before first surface reflections and simulate desired acoustic environments. More than 25 new supported touch screens. And more, described in the document Addendum. Access the Ui24R v3.0 firmware update by registering your mixer and then visit the download section below. Combining legendary Soundcraft performance with ultimate flexibility, Ui Series digital mixers add extra freedom to your live-sound and recording setups. As compact, complete digital mixing systems that double as rugged stage boxes and USB audio interfaces, Ui Series mixers make it easier than ever to enhance your performances and recordings with professional-grade sound. Providing dedicated DSP and advanced mixing capabilities in the palm of your hand, these powerful consoles feature built-in Wi-Fi, allowing you to control them from any computer, tablet or mobile device and mix from anywhere in the room. With the Ui Series, there are no constraints on how or where you mix. Whether you're recording in the studio, mixing front of house or performing onstage, the Ui Series gives you the freedom to control your mixes from any Android, iOS, Mac OS or Windows device. Through the integrated web-browser-based mixer interface, you'll have full Ethernet and Wi-Fi control over your mixer for tasks including adjusting channel faders, layering effects, saving settings and recalling presets and much more. You can even connect up to 10 devices simultaneously and set specific mix parameters for each, so band members can control their own monitor mixes. If Soundcraft's iconic British circuitry wasn't enough, the Ui Series features built-in digital signal-processing technology from renowned HARMAN brands dbx, DigiTech and Lexicon. Adding professional production power to your mix, dbx AFS2 provides automatic feedback suppression and DigiTech amp modeling offers tone-shaping capabilities, while classic Lexicon reverb, delay and chorus effects enhance your sound. Parametric and graphic EQs, high-pass filters, compressors, de-essers and noise gates round out the Ui Series built-in processing. Ui Series mixers might be compact in size, but there's nothing small about their functionality. Ensuring all of your sources deliver optimum sound, the Ui Series offers free creative reign over every facet of your mix with Subgroups, Mute groups, View groups and much more. Once you've dialed in the perfect sound, the Snapshot feature allows you to easily save mix settings for shows or recordings and recall them later. Paired with all the connections you'll need to run the show or record, Ui mixers feature fully recallable and remote-controlled mic preamps with XLR mic and combo inputs, stereo RCA inputs as well as dedicated Hi-Z inputs. Ui's outputs include balanced XLR and 1/4 main outs, XLR Aux outs and 1/4 headphone outs with level control. The consoles also offer two USB ports for two-channel playback and recording direct to USB storage devices, while the Ui24R takes it a step further by offering dual-path, multi-track recording directly to a USB drive or multi-track digital audio workstation on a Mac or PC.
