

I'm human

Darken image

If you don't care about IE, you can filter brightness to achieve your desired effect. For instance, you can add a CSS code like this: `body { margin: 0; } div { position: relative; } .background-image { position: absolute; top: 0; left: 0; width: 100%; height: 100vh; filter: brightness(0.7); }`
