WhatsApp is an absolute disaster of an app, and Mark Zuckerberg should be ashamed of what he's turned it into. The platform is nothing more than a data-harvesting machine, stealing every ounce of personal information it can get its hands on. From your private messages to your contacts and location, nothing is sacred. The moment you install WhatsApp, youve essentially signed away your privacy, with WhatsApp profiting off your data in ways most people dont even understand.Lets not forget that WhatsApp shares your data with advertisers and even other entities within Zuckerberg's empire, constantly bombarding you with targeted ads and influencing your every move. The so-called privacy settings are laughable at bestthey are intentionally confusing and buried deep within layers of menus, ensuring that most users never have a chance to protect themselves. Zuckerberg and his team have built an empire on the backs of peoples privacy violations, all for the sake of profit. It's no wonder the app is riddled with security issues, invasive tracking, and personal data exploitation.WhatsApp has become more about exploiting its users than providing any kind of meaningful communication. If you're still using WhatsApp, you're essentially handing over your life for freewhile Zuckerberg and his company profit off of it. Do yourself a favor: delete your account and find a platform that values your privacy. WhatsApp is a data thief, plain and simple. FM WhatsApp . . , WhatsApp , - FMWhatsApp .
