Is It Important? To confirm your school's PSAT test date, consult your counselor. One of the test's primary purposes is to act as a precursor to the SAT—as the name suggests, as an SAT practice test. Your school (or the school at which you're taking the PSAT test) should give you instructions on how to pay for the test and by when you'll need to submit your payment. Why? The PSAT 8/9, on the other hand, targets even younger folks—you guessed it: 8th and 9th graders—and is administered in the fall and spring. In addition to section scores, you'll be given subscores and cross-test scores. A raw score is equal to the number of questions you answered correctly. Nevertheless, if you're hoping to eventually secure a high SAT score, approaching the PSAT with diligence will be critical for your success. Moreover, your PSAT score has no effect on your GPA, so if you really don't want to take the test, you don't actually need to (unless it's mandatory at your school). Nearly identical to the PSAT/NMSQT, the PSAT 10 is only offered in the spring and is specifically geared toward 10th graders. But the two tests aren't identical. If you're uncertain whether your school will be administering the PSAT, or if you'd like to look for a list of schools in your area that will be administering it, use the College Board's school search tool. Only schools—not students—can request fee waivers from the College Board. This will train you for your specific area weaknesses, so your time is always spent most effectively to raise your score. Although sophomores aren't eligible for National Merit, taking the PSAT early can increase your shot at getting a high PSAT score—and a coveted National Merit scholarship—later on. The only exceptions are the Math section's grid-in questions. Of these, about 7,500 go on to win scholarship money. Most questions on the PSAT are multiple choice. By far the vast majority of schools hold the PSAT on the primary date.
