NOTE: A device with at least 2 GB of RAM is necessary for this game to work properly. Welcome to the final FNaF mashup, where you will once again be trapped by yourself in an office that fending off killer animatronics! With 50 selectable animated characters covering seven five nights at Freddy's games, customization options are almost endless. Mix and match any assortment of characters you like, set their difficulty from 0-20, then jump right into the action! From the office desk, you need to manage two side doors, two air outlets, as well as two air tubes, all which lead directly to your office. This time you will have to master other tools, although you want to complete the final challenges, tools like the heater, A/C, a global music box, an energy generator, and more. As if all this is not enough, you will also have to set laser traps in the mouths, collect Faz-Coins, buy items from the Prize Accounts, and as always, keep an eye on not one, but two, Pirate Cove tents! Other features also included:- Challenge menu with sixteen thematic challenges Voice acting by back favorites and new arrivals at the franchise- Unlockable Office Balls - cutscenes Unlockable NOTE: I play entirely in English. #MadeWithFusion 17 May 2020 Version 1.0.2 - Improved user interface- Sampled some graphs at a higher resolution Various corrections and improvements Personally I love this game and definitely think it is worth the price of \$3. It comes with everything that the original version of the pc has included cheats you can buy. (In my opinion, it is not really worth it). Obviously this game has a lot of controls and I think it's great that most things to control are through a button in the top right corner, however some controls have beenmade for the mobile phone and need a sort of fixing. First of all the torch button is not the best, it is a small icon between the mask and the camera that sometimes is a bit difficult to click, click,Sometimes golden Freddy is really difficult because you have to click on the mask/camera really fast and buttons are not the best so sometimes it takes too long to get on the mask/camera that makes me die at him. Another thing is Nightmare Marionette. To avoid it you have to keep a mouse out of his purchase by dragging it away or touching somewhere where it is not, it sounds easy but simply does not work great. Others then these minor problems that will probably be fixed in time, is still a large port and tons of fun to play. Then let me tell you. I love this game as well as the whole franchise, and I am so happy that this game was able to be transferred to the mobile, but it could still be rough around the edges. I was playing the creepy challenge 2 when he hung Bonnie hit me. Now this is not the problem. I understand that this game is difficult and that I am not very good at it, but I had my mask down almost as soon as I flipped the monitor and as soon as I heard the static that indicated it was in front of me. There would have been no reason for him to kill me like that, even if he was 20. I lowered my mask later and he didn't kill me earlier. This could be just one thing at a time, or something that could re-employ, but even then, this game is amazing! Of course, it has other design defects, but it's the end, it's still an explosion to play. I would strongly suggest you buy this game, as there are so many combinations that you can do with all 50 characters, it will take a little to get bored by it! (I don't even think it's possible) Even if you do not know one of the lores, it is not important for the game, and it will bring you still a lot of fun! I love this game a lot, but if there's something that needs to be solved is more stuff I suggest to put the full version on pc and mobile so I canmore animated and also the thing of clicking flash light is really hard to do sometimes so it is easier if u uThe flashlight icon a little larger and put on the Freddy mask for the animated toy and add more animated braided and also golden Freddy circus baby and nightmare mangle golden Freddy is a good character only for fast I put on Freddy that is when it comes to jumping me and circus baby and nightmare mangle are on the right corridor I will understand there, but still get me anyway For more information, see the developer's privacy policy.
