Customize your loadout and jump into a frantic match of Call of Duty. Earn killstreaks and dominate enemies while on your way to work, on your couch, or even in your bathroom with this title.Take the power, energy, and explosive nature of Call of Duty with you everywhere you go, in this iteration of the franchise for mobile devices. Call of Duty is an action-packed first-person-shooter that puts you in the boots of a soldier that's armed to the teeth. In this iteration, there are multiple guns, characters, and maps that have been stuffed into one standalone package. There are mentions of updates that will include single-player and co-op but, for now, there's a strong focus on multiplayer, and that's made pretty clear with the presence of maps like Nuketown. That's a place where team-based deathmatch has made a name for itself. The huge item variety is important because loadout customization is included. You're able to tune your personalized choice of weapons and gadgets to take with you into each firefight. With this title, you also get to see a return of a plethora of game modes. This includes team deathmatch, domination, capture the flag, and hardpoint. With a decent connection, all of these feel right and make for some great fun. A big deal, however, is the inclusion of an entirely new way to play the game. Battle royale has been introduced to the franchise, and it plays well on mobile. Here, you join up to one hundred total players in a fight for survival. You can enter the struggle on your own, in a duo, or as an entire squad. What makes this title stand out is its inclusion of a large variety of vehicles in the chaos. You can jump into ATVs, helicopters, tactical water rafts, and 4x4s to traverse an expansive map in your quest for victory. There's something to say about the customization present in this game. As you progress with every match, the game will track your stats and record your advancements. Every kill, victory, and achievement you earn unlocks new items. These include weapons, outfits, characters, and unique pieces of gear from the Call of Duty universe that can be included in your loadout. This is fantastic, to say the least. This keeps you engaged in every match, ever searching for the opportunity to improve and take steps closer to your next reward. The multiplayer finds another great way to keep you immersed. There's a ranking system that also tracks your stats, and stamps your profile with your progression. Every step you take, bullet you fire, and death you suffer is included on a virtual scoreboard. All of these add up to produce a specific title for your account. This is put on display for everyone to see. Bragging rights have always been a part of the franchise, and it's more present than ever here. This is made more clear with the inclusion of clans. This is a group you can form to play ranked clan matches with, and take on the challenge of climbing the leaderboards, unlocking items, and making new friends to play with. However, this system is a bit limited. There's no online multiplayer hub to share with your clan, or special place to show off your achievements. This title runs pretty well on most devices. It does require a pretty powerful set of hardware, though, and this might be something that puts off a lot of players. However, the game presents you with a comfortable and easy to navigate interface. Running around in multiplayer is fairly simple and shooting up your foes feels decent. Also, although key bindings are absent for obvious reasons, there is a level of customization available for the way you want to play. If you can't handle the default settings, there are certain tweaks you can make. You can steer away from the simple mode, which automatically fires at enemies when they pop into your crosshair, and try out the advanced mode. The latter gives you more control because you must manually fire your weapon as you navigate the battlefield. This traditional setup might feel more natural for veterans. However, it's still very different from the classic mouse and keyboard setup, so it does feel a little awkward no matter what setting is selected. Where can you run this program? This game runs on most Android devices. The version isn't as important as the strength of the device in question. It's also available for iPhone. Is there a better alternative? No. This game gives you everything you need in a twitchy first-person-shooter. There are others that compare, like Bullet Force, but it doesn't have the charm, visuals, and accuracy that this title provides.Call of Duty really shines in this iteration. It's a small step onto the smaller screen, but it's a leap into a new, and fun way to enjoy the franchise. Its highlight is the ability to take the action-packed game with you anywhere in the world. As if that weren't enough, you can even play with friends, and do so in competitive ranked matches. It has everything you need for quick bursts of fun. Should you download it? Yes. If you're looking for a fun, action-packed, and customizable first-person-shooter, this is a perfect choice. ConnectWise Mobile is a mobile app for Android and Apple devices, created by Connect Wise. In Mobile Legend Bang Gang, you can play with up to 4 other friends in a 5vs5 MOBA competition against human opponents. With 10-second match-making, you won't have to wait long for your next game. Choose from the massive roster of heroes and take part in hectic 10-minute battles. The gameplay itself is similar to other MOBA games, notably League of Legends. Your overall goal is to defeat the enemy's base by taking control of lanes, jungling, and conquering opposing heroes. The game was developed and published by a subsidiary of ByteDance, called Moonton, in 2016. Since then, it has gained a huge following in Southeast Asia, going so far as to be chosen for the first medal event in the 2019 Southeast Asian Games esports competition. Fans of MOBA games will be instantly familiar with the gameplay, where each team of 5 players is fighting to destroy the enemy base while defending their own base. The bulk of the combat occurs across three lanes, referred to as TOP, MIDDLE, and BOTTOM. These lands connect the bases together and also used by computer-controlled "minions" who fight for the teams.Also present are 18 defense towers, 4 jungle areas, and 2 wild bosses. Heroes have a range of abilities that block damage, reduce the amount of damage taken, heal teammates to increase their number of hit points, and even control the enemy and use them against their own team. Heroes are divided into different classes; Assassins, Support, Mages, Marksmen, and Tanks. Each is vital to your team's success. When the game was initially released, it had ten heroes available, that number has now grown to over 100 heroes to pick from, and more are continuously added. Mobile Legends Bang Bang places vast focus on your skill level, as opposed to distinct hero stats. You can't train and increase your hero's stats in any way. Instead, players need to use their skills and abilities to outperform the competition. You won't find any pay-to-win mechanics or long-term players holding an unfair advantage due to their increased hero levels or high stats. How to play Mobile Legends Bang Bang?As Mobile Legends Bang Bang is an Android game, you don't need a gamepad or keyboard and mouse to play. All of the controls are available on your Android screen. On the left-hand side, you have a virtual joystick, while on the right-hand side are two skill buttons. Essentially you only need one finger from each hand to play. It's a straightforward system to learn and very beginner-friendly. Quick matches and even speedier matchmaking One of the significant benefits of having such a large number of players is the incredibly quick match-making. It only takes 10 seconds to match players for a game. The matches themselves are also fast-paced, lasting no more than 10 minutes. Mobile Legends Bang Bang does this by skipping the boring and dull early-game strategy elements like leveling up. Instead, you can take your heroes straight into battle. This quick-paced gameplay makes the game much more accessible to people who don't like the repetitiveness of farming or who want to pick up and play quickly. Smart AI assistance is on-hand As powerful as smartphones are these days, their internet connection will never be as stable as a computer with an ethernet cable. It's not unheard of for people to suddenly lose connection when playing due to their internet dropping out. If your internet or the internet of one of your teammates suddenly drops, Mobile Legends' reconnection rulewill get you back in the game as quickly as possible. And while you or one of your teammates is offline, a powerful AI assistant takes over, so you won't be at a disadvantage. Mobile Legends Bang Bang has a lot of great things going for it. It's easy to pick up and play, you don't need the latest Android smartphone to play it, the controls are easy to learn, it has super-fast match-making, and the gameplay is fast-paced without the need to grind. Should you download it?If you're looking for a MOBA that's free to play with 10-second matchmaking and 10-minute matches that don't require you to grind and level up continuously, then you should download it.
