Citing an online video in MLA style involves several key details. You need to include the videos title, creators name, website, and upload date. This guide will show you how to format these components in your Works Cited entry and in-text citations. Authors Name: Recognizing the Creator Identifying the correct author for online videos is crucial. The author could be an individual, a group, or an organization responsible for the content. For example, a YouTube video might be created by a single user, while a documentary could be produced by a renowned studio. Properly recognizing the author ensures appropriate credit is given. Video Title: Formatting and Punctuation Tips The video title should be presented in quotation marks, maintaining the original capitalization and punctuation. This preserves the integrity of the title, reflecting how it appears on the platform. For example, Understanding Quantum Physics should be cited exactly as it is titled. Website Name: The Role of the Hosting Platform The website name, like YouTube or Vimeo, is crucial in the citation. It informs the reader where the video is hosted. Italicize this element to distinguish it from other citation details. Date of Publication: Determining the Right Date The date of publication refers to when the video was first available online. This information is crucial for understanding the context and timeliness of the content. Recording this date accurately, typically formatted as Day Month Year, enhances the citations reliability. The URL: Handling Long Links URLs are essential for locating the video. MLA style recommends including the full URL. If a URL is very long, consider using a URL shortener, ensuring the link remains functional. Gathering Necessary Information Before starting your citation, gather all relevant information: the authors name, video title, website name, publication date, and URL. This collection of details is the foundation of an accurate citation. Formatting the Authors Name The authors name should be formatted as Last Name, First Name. If the author is an organization, write the full name of the organization. For example, Smith, John or National Geographic. Capitalizing the Video Title Capitalize major words in the video title, including the first and last words. Avoid capitalizing articles, prepositions, and conjunctions unless they begin the title. For instance, Exploring the Depths of the Ocean. Italicizing the Website Name Ensure that the website name is italicized consistently throughout your citations. This practice differentiates it from other citation elements, providing clarity. For example: YouTube or Vimeo. Inserting the Publication Date When inserting the publication date, ensure you follow the correct format and verify the dates accuracy. Avoid using the date you accessed the video unless specified by your instructor. Shortening URLs When faced with lengthy URLs, use a reliable URL shortener to simplify your citation while maintaining access. Always test the shortened URL to ensure it directs correctly to the intended video. YouTube Videos: Popular and Educational Content For a typical YouTube video: Smith, John. Understanding Quantum Physics. YouTube, uploaded by Physics World, 15 Mar. 2023, www.youtube.com/watch?v=123456789. Webinars: Professional and Academic Sources For webinars: Doe, Jane. Advances in AI Research. Webinar Central, hosted by AI Network, 20 Jan. 2024, www.webinarcentral.com/ai-research. Documentaries: In-depth and Analytical Videos For documentaries: National Geographic. Essentially, a writer will need to take note of primary elements in every source, such as author, title, etc. and then assert them in a general format. Thus, by using this methodology, a writer will be able to cite any source regardless of whether its included in this list. However, this guide will highlight a few concerns when citing digital sources in MLA style. Best Practices for Managing Online Sources Because online information can change or disappear, it is always a good idea to keep personal copies of important electronic information whenever possible. Downloading or even printing key documents ensures you have a stable backup. You can also use the Bookmark function in your web browser in order to build an easy-to-access reference for all of your project's sources (though this will not help you if the information is changed or deleted). It is also wise to keep a record of when you first consult with each online source. MLA uses the phrase, Accessed to denote which date you accessed the web page when available or necessary. It is not required to do so, but it is encouraged (especially when there is no copyright date listed on a website). Important Note on the Use of URLs in MLA Include a URL or web address to help readers locate your sources. Because web addresses are not static (i.e., they change often) and because documents sometimes appear in multiple places on the web (e.g., on multiple databases), MLA encourages the use of citing containers such as Youtube, JSTOR, Spotify, or Netflix in order to easily access and verify sources. However, MLA only requires the www. address, so eliminate all https:// when citing URLs. Many scholarly journal articles found in databases include a DOI (digital object identifier). If a DOI is available, cite the DOI number instead of the URL. Online newspapers and magazines sometimes include a permalink, which is a shortened, stable version of a URL. Look for a share or cite this button to see if a source includes a permalink. If you can find a permalink, use that instead of a URL. Abbreviations Commonly Used with Electronic Sources If page numbers are not available, use par. or pars. to denote paragraph numbers. Use these in place of the p. or pp. abbreviation. Par. would be used for a single paragraph, while pars. would be used for a span of two or more paragraphs. Basic Style for Citations of Electronic Sources (Including Online Databases) Here are some common features you should try to find before citing electronic sources in MLA style. Not every web page will provide all of the following information. However, collect as much of the following information as possible: Author and/or editor names (if available); last names first. "Article name in quotation marks." Title of the website, project, or book in italics. Any version numbers available, including editions (ed.), revisions, posting dates, volumes (vol.), or issue numbers (no.). Publisher information, including the publisher name and publishing date. Take note of any page numbers (p. or pp.) or paragraph numbers (par. or pars.). DOI (if available, precede it with " ") , otherwise a URL (without the https://) or permalink. Date you accessed the material (Date Accessed). While not required, saving this information is highly recommended, especially when dealing with pages that change frequently or do not have a visible copyright date. Use the following format: Author. "Title." Title of container (self contained if book), Other contributors (translators or editors), Version (edition), Number (vol. and/or no.), Publisher, Publication Date, Location (pages, paragraphs and/or URL, DOI or permalink). 2nd containers title, Other contributors, Version, Number, Publisher, Publication date, Location, Date of Access (if applicable). Citing an Entire Web Site When citing an entire website, follow the same format as listed above, but include a compiler name if no single author is available. Author, or compiler name (if available). Name of Site. Version number (if available), Name of institution/organization affiliated with the site (sponsor or publisher), date of resource creation (if available), DOI (preferred), otherwise include a URL or permalink. Date of access (if applicable). Editor, author, or compiler name (if available). Name of Site. Version number (if available), Name of institution/organization affiliated with the site (sponsor or publisher), date of resource creation (if available), URL, DOI or permalink. Date of access (if applicable). The Purdue OWL Family of Sites. The Writing Lab and OWL at Purdue and Purdue U, 2008. owl.english.purdue.edu/owl. Accessed 23 Apr. 2008. Felluga, Dino. An E-Book Citations for e-books closely resemble those for physical books. Simply indicate that the book in question is an e-book by putting the term "e-book" in the "version" slot of the MLA template (i.e., after the author, the title of the source, the title of the container, and the names of any other contributors). Silva, Paul J. How to Write a Lot: A Practical Guide to Productive Academic Writing. E-book, American Psychological Association, 2007. If the e-book is formatted for a specific reader device or service, you can indicate this by treating this information the same way you would treat a physical book's edition number. Often, this will mean replacing "e-book" with "[App/Service] ed." Machiavelli, Niccolo. The Prince, translated by W. K. Marriott, Kindle ed., Library of Alexandria, 2018. Note: The MLA considers the term "e-book" to refer to publications formatted specifically for reading with an e-book reader device (e.g., a Kindle) or a corresponding web application. These e-books will not have URLs or DOIs. If you are citing book content from an ordinary webpage with a URL, use the "A Page on a Web Site" format above. An Image (including a Painting, Sculpture, or Photograph) Provide the artist's name, the work of art italicized, the date of creation, the institution and city where the work is housed. Follow this initial entry with the name of the Website in italics, and the date of access. Goya, Francisco. The Family of Charles IV. 1800. Museo Nacional del Prado, Madrid.
