Fluke 5522a calibrator manual

It is the most complete software solution available to calibration professionals. Internal circuitry offers "mistake proof" protection The 5522A provides reverse power protection, immediate output disconnection, and/or fuse protection on the output terminals for all functions. Priority software support helps you stay productive MET/SUPPORT Gold is an annual membership program offering premium support and services to help you stay as productive as possible with MET/CAL Plus software. It includes MET/CAL® - the industry-leading software for automated calibration and MET/TRACK® - a dedicated system to manage your test and measurement assets. Metrology training increases skill levels Calibration and metrology training from Fluke Calibration can help you and your staff become more knowledgeable in a wide variety of disciplines. Members also receive invitations to regular calibration software web seminars and user group meetings. Automate to increase throughput and efficiency Quality standards impose stringent requirements for documenting, reporting, and controlling calibration processes and results. Innovation from the leader in calibration Fluke Calibration pioneered the multi-product calibrator concept, creating a family of instruments that allow you to calibrate the widest range of today's electronic test tools with a single instrument instead of requiring separate voltage calibrators, resistance calibrators, current calibrators, and so forth. Instructor-led classroom training is available for general topics in metrology, as well as for calibration software. The front and rear access doors are removable, so you can calibrate with the 5522A while its top, bottom and side panels remain protected - and avoid having to completely unpack and then re-pack the calibrator. A redesigned front panel and ergonomic carrying handles make it easy to transport the calibrator short distances within the cal lab. This protection is for applied external voltages up to +/-300 V peak. Fluke Calibration multi-product calibrators offer simple, portable, cost-effective voltage calibration, resistance calibration, and current calibration solutions that allow you to match your calibrator to your workload and your budget. Services include free software updates and upgrades, free access to the Fluke MET/CAL Warranted Procedures Library, plus discounts on training and custom procedure development. Rugged carrying case enables safe transport and efficient onsite calibration An innovative carrying case accessory makes it easier than ever to calibrate outside of the calibration laboratory, as well as inside. Calibration and repair service Fluke Calibration offers extensive calibration support and service to ensure your long-term satisfaction and return on investment in resistance calibrators, dc calibrators, current calibrators, voltage calibrators, and other calibration equipment. Using MET/CAL Plus Calibration Management Software can help you meet these requirements easily while also enabling you to increase throughput and streamline your voltage calibration, resistance calibration, and current calibration processes. MET/CAL Plus is a powerful application for creating, editing and testing calibration procedures and collecting and reporting results on a wide variety of instruments. On-site training can also be scheduled if you have a number of people in your organization who would benefit. The shock-mounted case features built-in handles and wheels, enabling you to move the calibrator from place to place easily and safely. We also offer fast, quality repair and calibration services including a module exchange program and full support in setting up your lab. Use only a few of the Gold services and you can easily recover more than the cost of your membership fee. Our worldwide network of calibration centers offers accredited calibrations traceable to national standards. Fluke Calibration provides the calibrators, standards, software, service, support and training you need for a complete solution in your cal lab. In addition to its product line of resistance calibrators, dc calibrators, voltage calibrators and current calibrators, Fluke Calibration is also recognized for its offerings in temperature, pressure, power, process, and rf calibration.
