You can use different keyboard languages, sometimes called input methods, on your Chromebook to Change your typing language Use special characters, like accent marks or currency symbols Set your keyboard languages At the bottom right, select the time. Select Settings . Under "Device," select Keyboard Change input settings. Under "Input methods," select the keyboard languages you want to use Add. "Enabled" is listed under the current keyboard. To set a different keyboard language, use your cursor to point to and select another keyboard. Switch between keyboard languages If you add more than one keyboard language, you can switch between languages from the shelf, next to the time. At the bottom right, select the time. Select Settings . Under "Device," select Keyboard Change input settings. Under "Inputs and keyboards," turn on Show input options in the shelf. Your current keyboard language code appears on the shelf, next to the time. Select your keyboard language code. In the "Input methods" box, select the language you want to switch to. Tip: You can also switch your language by pressing Ctrl + Shift + Space until the language you want is selected. To switch back, press Ctrl + Space. Add accent marks The English (US) with International keyboard has the following accent marks: Acute ( ' ) ' then letter Grave ( ' ) ' then letter Tilde ( ~ ) Shift + ' then letter Circumflex ( ^ ) Shift + 6 then letter Umlaut/diaeresis ( " ) Shift + ' then letter Cedilla ( , ) Shift + AltGr + 5 then letter Tip: On the US International (PC) keyboard, you can use ' then letter. Use the following combinations to type specific international characters on the US International keyboard. Important: The AltGr key is the Alt key on the right of the keyboard. Acute (é) AltGr + e Acute (á) AltGr + a Acute (ü) AltGr + u Acute (í) AltGr + i Acute (ó) AltGr + o Tilde (ñ) AltGr + n Umlaut/diaeresis (ü) AltGr + y Umlaut/diaeresis (ö) AltGr + p Umlaut/diaeresis (ä) AltGr + q Cedilla (ç) AltGr + , Add accent marks with your keyboard You can use your physical keyboard to insert accents, also called diacritical marks, into text. Use the accents menu Important: Accents aren't available for all characters. To insert accents: Hold down the key for the letter you want to add an accent to. When the menu opens, press Tab or the right arrow to enter the menu. Use the arrow keys to highlight the accent you want. Press Enter, Space, or continue to type to insert the highlighted option. Tip: When the menu opens, you can also type the number key of the mark you want, or you can click on it. To turn off accents: At the bottom right, select the time. Select Settings . Under "Device," select Keyboard Change input settings. To open the menu, under "Inputs and keyboards" to the right of English (US), select More . Under "Physical keyboard," turn off accents and special characters. Use modifier keys You can also insert accents with the Alt key and a character. Important: Accents aren't available for all characters. Accent circumflex (ô) alt + i Acute (é) alt + e Umlaut (ë) alt + u Tilde (ñ) alt + n Accent grave (è) alt + ` Tip: You can also create accents on a digital keyboard. Learn how to make diacritical marks on a digital keyboard. Post to the help community Get answers from community members Fitbit-Bedienungsanleitungen
