The project has been carefully arranged, taking speed into cognizance, to make it as straightforward as possible. All you have to do is drag and drop files, edit the text, and voila! Your video is ready to roll. Please note, there is no need to add after effects. So without further ado, let's proceed! The first step as always is to open your Adobe Premiere Pro CC Program. Drag And Drop The Overlay's Provided To You. Click On The Effects Tab. Change The Blend Mode (Mess with whatever looks good) (Screen, Overlay I would use). Drag and Drop into the clip. You're done, ALWAYS mess with the keyframe that best suite your needs. It is important that you add different presets into your Adobe Premiere Pro editing tool because they will enable you to come up with nice creative ideas that will boost your productivity, which will invariably give rise to new ideas, thereby creating more awesome opportunities. BJK Productions has been successful with its mission to empower others via its video editing tutorials, and every second the numbers of viewers/readers/subscribers keeps increasing and it makes us very glad that our efforts are not wasted; hence we are encouraged to do more, and we assure you that we will do more, as your success is very important to us. BJK Productions is a film director, a well trained and certified personal trainer, and a successful businessman. Our YouTube channel has gotten over 5 million views, with over 20,000 subscribers, and over 20,000 followers on Instagram. Please note: Every file downloaded from the BJK Productions website is yours to keep for as long as you possibly can. No extra licensing fees and the files can be used freely for both personal and commercial video productions, and you can use it anywhere, anytime, as you please. BJK Productions constantly keeps its website updated with new products, all because we want you to stay abreast with the latest, presets in the video editing world. Our customer support is top notch and responsive, hence, we are always on hand to help you, should you experience any issue while editing. Send us an email about your issues and we will promptly respond, so your work doesn't get delayed. You can get notifications about new products when they get posted; all you need to do is signup for our newsletter. Just download the file, and drag it into your Premiere Pro 'Presets' folder on your computer.In Adobe Premiere Pro CC, right click 'Presets' in your 'Effects' folder and select 'Import Presets'.Find the FILM CRUX Glitch Transitions Vol. 1 preset file you downloaded and select it. (Once imported, you will not need to import them again.)Create an adjustment layer above your footage and drag it out over the clips you want to add a transition to.Each transition will recommend how many frames your adjustment layer should start before the cut between your two clips,Just drag the transition of your choice onto the adjustment layer overlapping your two clips.That's it.And the recommendations are just that. You can experiment by moving your adjustment layers around on your timeline to create new effects or tweak the transitions to suit your needs.
